New Society Publishers, United States, 2017. Paperback. Condition: New. Second Edition. Language: English. Brand new Book. Written for the layman, this is the fully revised and updated guide for individuals and businesses interested in generating their own electricity using the Sun. Practical and accessible, it provides a basic understanding of electricity, wiring, and solar energy, and guides the reader through site assessment and determining the type of system needed, providing a solid understanding of grid-tied and off-grid systems, along with important guidelines on installation. Power from the Sun 2nd Edition discusses types of PVs and PV systems, and includes comprehensive information on recent changes and improvements in PV modules, charge controllers, inverters, batteries, generators, and net metering policies. It offers an excellent overview of the many options available, allowing the reader to make the best choices for their individual situation during the design, installation, and operation of a solar electric system. The definitive guide for homeowners, business owners, installers, architects, and just about anyone interested in lowering energy bills while achieving greater energy independence. Dan Chiras is Director of the Center for Renewable Energy and Green building through which he teaches workshops solar electricity, wind energy, passive solar design, natural building, and green building. He is also president of Sustainable Systems Design, Inc., a company that installs residential solar electric and wind energy systems and consults on passive solar design, residential renewable energy, and green building throughout North America. Dan is the author of 32 previous books, including The Homeowner's Guide to Renewable Energy and Power from the Wind.
